## Program Overview

### Steps to Determine Eligibility for the Warrant Officer Program

The following information will assist you in determining eligibility and submitting your application.

#### General Information On The Warrant Officer Program

Warrant Officers are technical and tactical leaders who specialize, throughout an entire career, in a specific technical area. The Army Warrant Officer Corps comprises less than three percent of the total Army. Although small in size, the level of responsibility is immense and only the very best will be selected to become Warrant Officers. Benefits include extended career opportunities, worldwide leadership assignments, and increased pay and retirement benefits.

#### Non-Army Personnel

A joint service agreement allows service members who are selected for this program to be discharged from their component and enlisted in the Army. Applicants must apply for this program while on active duty and must have two years remaining on their enlistment contract; civilians must contact their local Army recruiter. Applications are forwarded from the individual to Headquarters United States Army Recruiting Command, USAREC. After screening, the application is forwarded to the appropriate proponent who evaluates the applicants' technical experience and determines if the applicant is qualified to compete against other qualified applicants for the limited warrant officer positions. Applications from those who are not technically qualified will be returned to the applicant without further processing. Further requirements for Non-Army personnel are listed below under "Additional Requirements For Non-Army Personnel".

A selection board will consider fully qualified applications. Selection is highly competitive and board members select applicants based upon the whole person concept. Leadership and technical abilities will be evaluated and only the best qualified will be selected.
